

INDIAN SCHOOL NIZWA - WORKSHEET

Science			
Chapter -11: EARTH , SUN AND MOON			
Name: _____		Date: _____	Class: V Sec: ____

I) Tick the correct answer

- The Sun is a _____.
a) Planet b) Star c) Moon d) Comet
- The changing shapes of the Moon are called _____.
a) Moon patterns b) Moon phases c) Moon shadows d) Orbits
- The innermost layer of the Earth is called the _____.
a) Crust b) Mantle c) Inner core d) Outer core
- How many planets are there in the Solar System?
a) 5 b) 7 c) 8 d) 9
- A solar eclipse occurs when the _____ comes between the Sun and the Earth.
a) Earth b) Jupiter c) Moon d) Mars
- A lunar eclipse occurs when the Earth comes between the Sun and the _____.
a) Mars b) Moon c) Jupiter d) Venus

II. Fill in the blanks:

- The Sun is the main source of _____ and heat.
- The Moon takes _____ days to complete one revolution around the Earth.
- The Earth's outermost layer is called the _____.
- The Solar System lies in the _____ Galaxy.
- A full moon occurs once every _____ days.

III. State TRUE or FALSE

- The Sun is smaller than Earth. _____
- The Moon has its own light. _____

INDIAN SCHOOL NIZWA - WORKSHEET

3. The mantle is the thickest layer of the Earth. _____
4. Mercury is the closest planet to the Sun. _____
5. A lunar eclipse happens only at night. _____
6. The Solar System has one star. _____

Match the Following

IV.

1. Sun	a) Earth's outer layer
2. Crust	b) The Moon moves around it
3. Orbit	c) A large collection of stars
4. Milky Way	d) Path taken by planets
5. Earth	e) A star at the centre of the Solar System

V. Short Answer Questions

1. What is the Sun made of?

2. Name the 5 phases of the Moon.

3. What are the three main layers of the Earth?

4. Why is the Sun important for life on Earth?
