

Name of the Student:

Class: VII

Sec:

I. Fill in the Blank: Fill in the blank with the correct words.

1. The process by which water changes into vapor due to the Sun's heat is called _____.
2. The rise and fall of ocean water, usually twice a day, are known as _____.
3. _____ are streams of water flowing continuously in definite directions on the ocean's surface.
4. The ocean water is salty because it contains large amounts of _____.

II. Multiple Choice Questions: Choose the correct answer from the choices for each question.

1. What is the process called when water circulates between the oceans, atmosphere, and land?
 - a) Ocean currents
 - b) Water cycle
 - c) Tides
 - d) Condensation
2. What causes the rhythmic rise and fall of ocean water?
 - a) Rainfall
 - b) Tides
 - c) Evaporation
 - d) Melting glaciers
3. Where do most warm ocean currents originate?
 - a) Near the poles
 - b) Near the equator
 - c) In mountains
 - d) In rivers
4. Which of the following is the largest source of salt water on Earth?
 - a) Rivers
 - b) Lakes
 - c) Oceans
 - d) Underground water
5. What is a tsunami?
 - a) A large storm
 - b) A strong ocean current
 - c) A huge tidal wave caused by an underwater disturbance

d) A type of rainfall

III. Diagram Based Questions:

Mark the positions of the Sun, Moon and the Earth to complete the following diagrams. Give them labels.

A. Spring Tide

B. Neap Tide
